

Mini Excavator

They're small, but they pack a punch! JCB's Mini Excavator is so narrow it could fit through your front door. Even its big brother the Midi is still pretty tiny, so it's no wonder you see them most on places like building sites and roadworks, where there just isn't that much space!

To find other JCB Machines why not visit the 'info zone' section at www.jcbexplore.com
