

JCB Tracked Excavator | JS220 Long Reach

This is one of the biggest JCBs you'll ever see, and it is totally unstoppable.

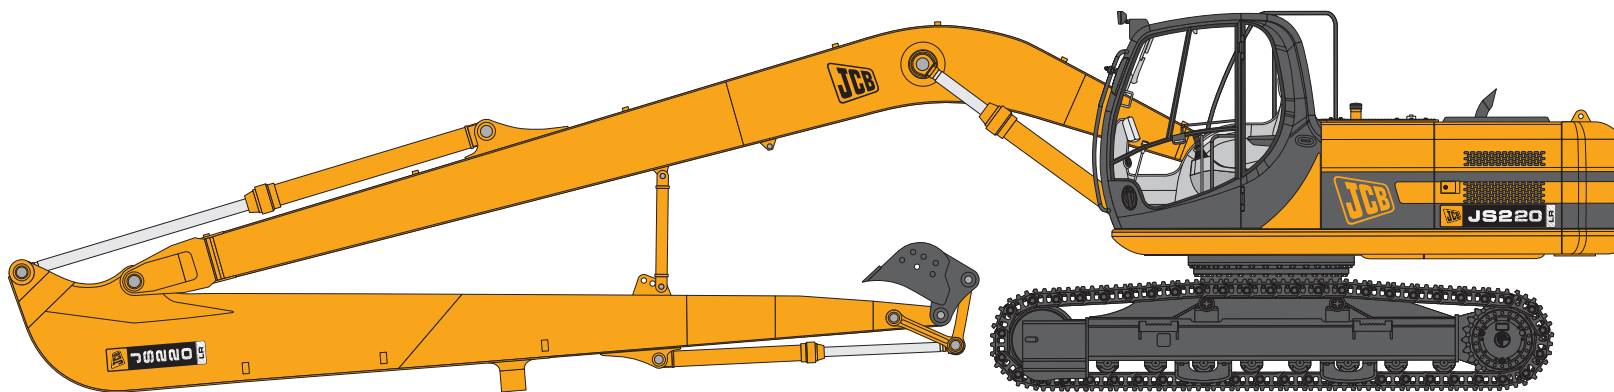

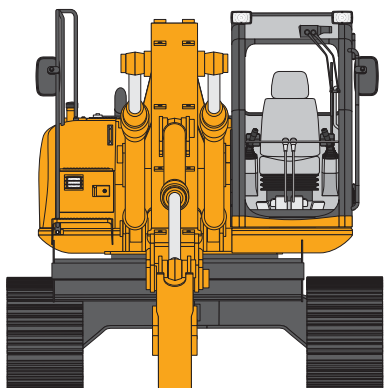

These are great for slippery mud because they've got huge tracks that dig into anything, so whoever's using it can make sure they always get enough grip, wherever they are!

One thing for sure, the JCB Tracked Excavator can shift mud like it is its number one enemy.

To find out more about other JCB machines you can visit the 'Info zone' at www.jcbexplore.com

Where are you most likely to see a JCB Excavator?

- Roadworks
- Farms
- Quarries
- Recycling Stations
- Waterways maintenance
